I am an owner/operator of diesel trucks. I am also a subscriber to XM radio. As I move about the country on a daily basis, I find XM radio to be a great tool for my business. I get the news, weather, traffic any time and anywhere I need it. Where I use to rely on AM and FM, only to fumble to find a station I could somewhat get, XM is there! All that I talk to in the transportation industry feel the same as I about XM radio! I respectfully request (being a tax paying individual/company) your rejection of the NAB'S petition 04-160.

As I drive along the streets in "America" and hear radios in passing vehicles (at different volumes), I am reminded daily that we still have the freedom to purchase and listen to what we individually want!

Thank you for your attentiveness of this matter.

Michael A. Willis
